Accelerate innovation with CloudSuite PLM for Fashion

Whether a company has 20 users or more than 2,000, Infor CloudSuite PLM for Fashion is designed to accelerate development cycles to get ideas to market faster. With its intuitive, personalized user interface, CloudSuite PLM for Fashion is an end-to-end solution that connects every aspect of a product's lifecycle, from the first sketch to the store.

Take a closer look

In today's highly competitive and consumer-driven marketplace, fashion companies are under enormous pressure to create exciting new products at a moment's notice.

By providing a central repository for storing and accessing design and development information, CloudSuite PLM for Fashion can help businesses meet this need for speed, while also making sure new styles and collections are delivered with consistent quality—at the right time and right price.

Energize your team with an innovative user experience

Work faster and smarter than ever with an intuitive interface, simple drag-and-drop functionality, and personalized homepages that can be created using widgets. Home pages help users set up predefined ways of working—allowing them to find styles in a certain status, or respond to notifications and comments. There's also no need to worry about user counts; CloudSuite PLM for Fashion can scale to fit any business' needs—anywhere, anytime.

Connect design with data

Featuring a bidirectional Adobe® Illustrator® plugin, Infor CloudSuite PLM for Fashion helps creative teams work with the tools they know and love.

New concepts can be directly uploaded into the system and quickly brought to life through a set of visual libraries, pre-configured templates, and tools for mass creation and updating.

With creative design ideas connected to commercial objectives and technical specifications, Infor CloudSuite PLM for Fashion increases accuracy, reduces waste, and helps commercialize new styles faster.

Reduce time to value

Unlike legacy launches, cloud launches can be completed in months—not years.

Take a closer look

Collaborate across your value chain, anytime, anywhere, on any device

By creating an open environment for creative, technical, and commercial teams, Infor CloudSuite PLM for Fashion breaks down silos and helps key stakeholders work together, using the same set of real-time data.

By helping businesses share information with offices locally and globally, Infor CloudSuite PLM for Fashion integrates internal departments and selected partners—which increases accuracy, reduces manual data entry, and speeds up the entire decision-making process.

Since work is done in the cloud, users can work the way they want, whether on a PC, Mac, tablet, or smartphone.

Invest in technology for the future

Built on Infor OS, CloudSuite PLM for Fashion brings productivity, business process, and operational insights that go beyond enabling business—it drives it. Teams can work smarter and faster with built-in internal and external collaboration.

Harness the power of Infor OS

THE PLATFORM FOR A FUTURE-PROOF, DIGITALLY DRIVEN ORGANIZATION

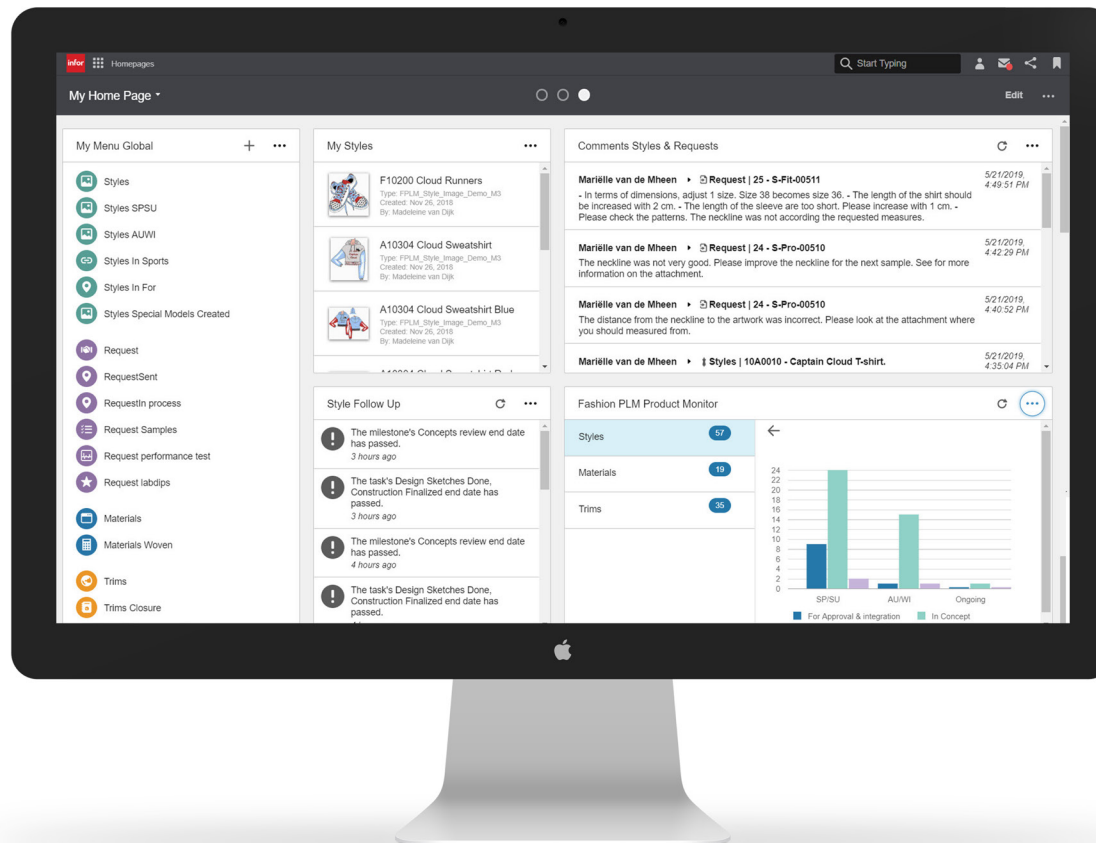

Infor Operating Service (OS) serves as the unifying foundation for the entire CloudSuite ecosystem, including Infor CloudSuite PLM for Fashion. Its focus is on delivering technology that drives business—putting the user at the center of every experience and powering digital transformation from the ground up. The result is a connected, intelligent network that automates, anticipates, predicts, and informs stakeholders in everything they do.

Specifically tailored for apparel, footwear, textiles, accessories, luxury goods, and retail fashion companies, Infor CloudSuite PLM for Fashion can scale to fit any enterprise.

Collaborate in the cloud with Ming.le

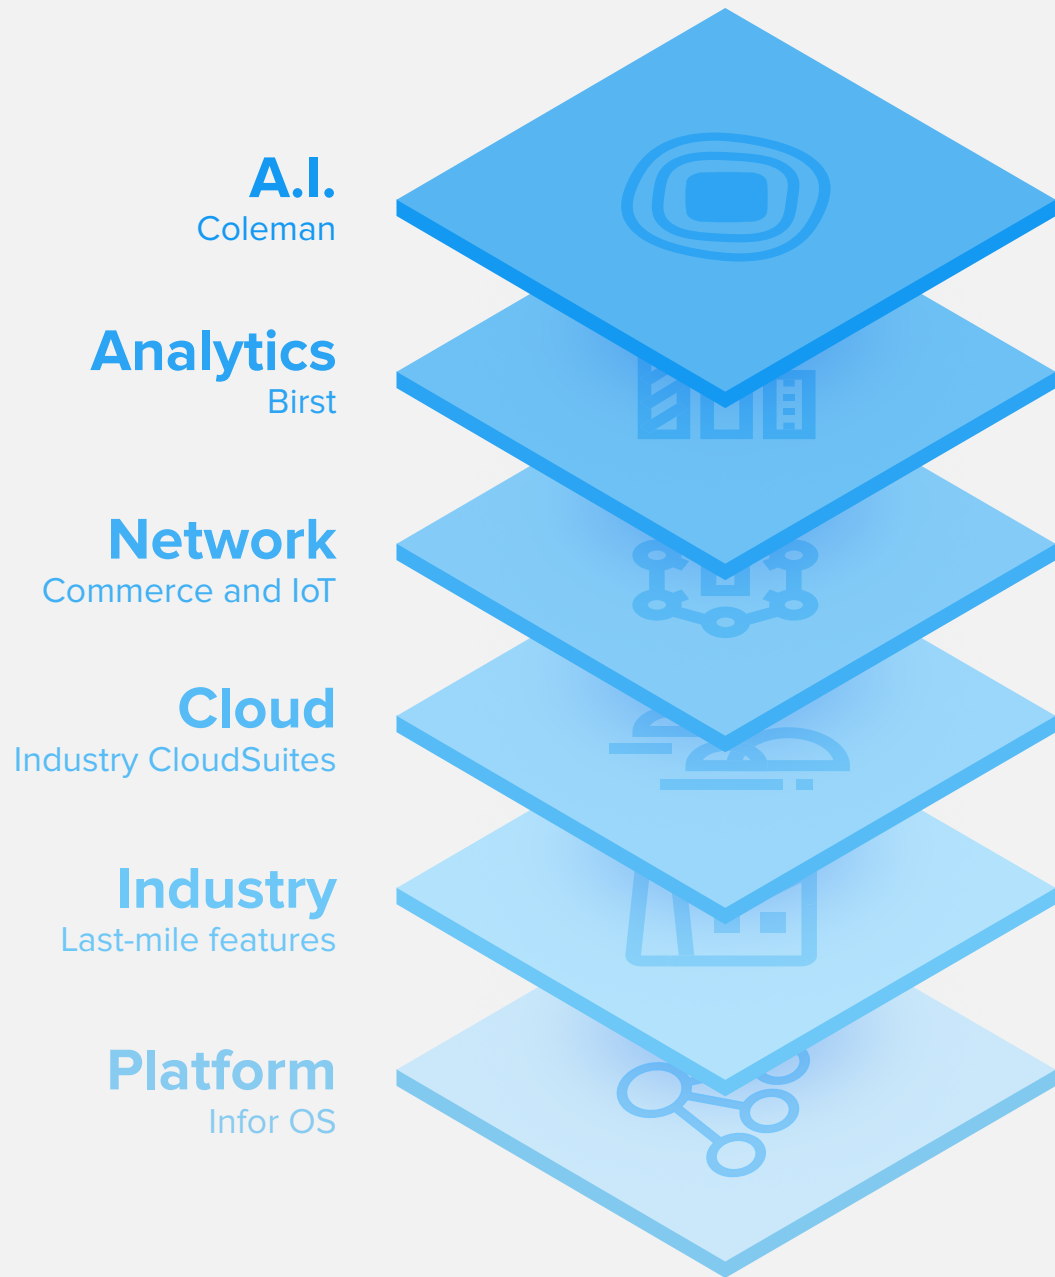

CloudSuite PLM for Fashion provides user-configurable homepages, allowing the user to drag-and-drop, add, and multi-select role-based views that provide a personalized experience to fit the way they work. Leveraging the power of Infor's collaboration platform, Ming.le, and the Infor OS platform, users can see tasks, notifications, and peer comments from CloudSuite PLM for Fashion and other applications connected into Ming.le.

Infor's strategy

Infor's strategy is designed to be your foundation for transformation and progress. To drive perpetual innovation in the enterprise, Infor business applications are specialized by industry and built for the cloud to enable a global supply chain, networked analytics, and an artificial intelligence-led user experience.

Industry leading user experience

CloudSuite PLM for Fashion's intuitive user experience makes it easy to use—which means quicker user adoption with lower training requirements, and thus, shorter time to value. Custom homepages, drag-and-drop features, and task-driven functionality make mass creation and updates simpler than ever.

By linking planning, design, development and pre-production activities on a common platform, Infor CloudSuite PLM for Fashion delivers a single set of accurate, real-time data that increases visibility and provides the foundation for closer collaboration and unified teamwork.

Leading fashion-specific functionality

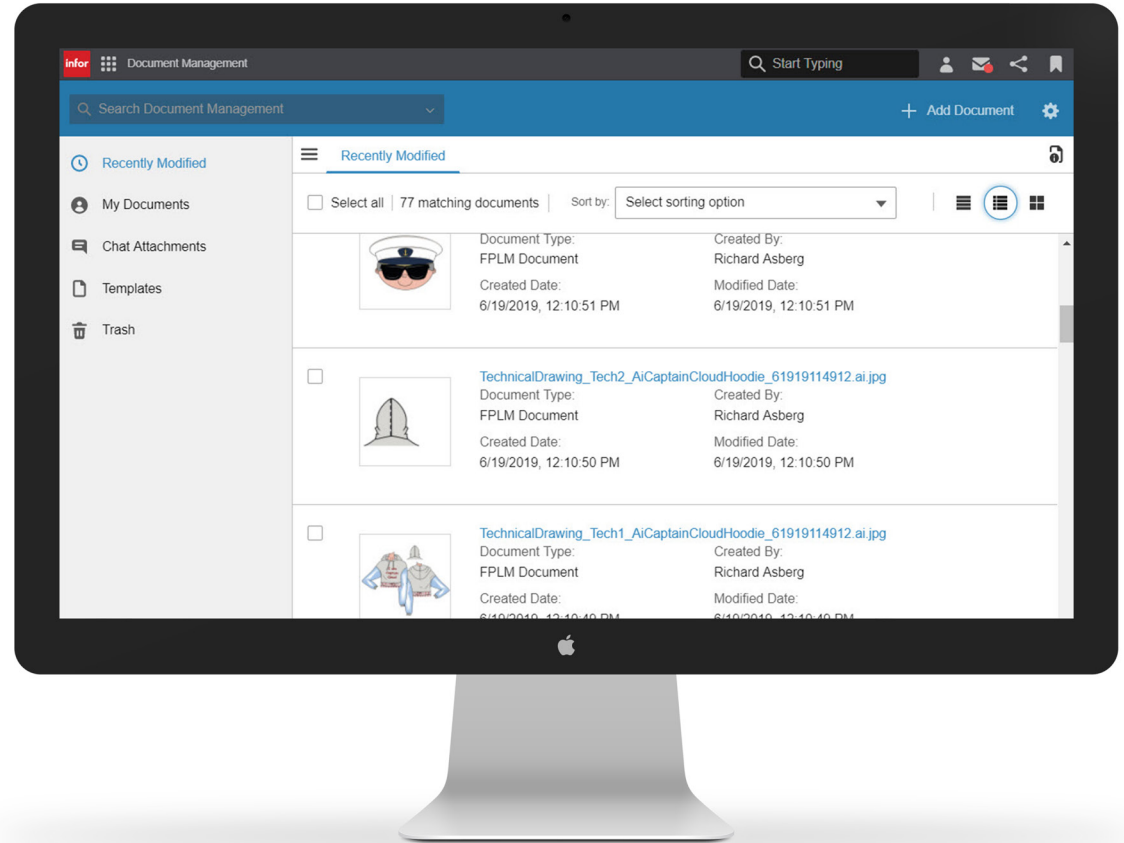

Based on years of fashion experience, CloudSuite PLM for Fashion is a powerful product lifecycle management solution that offers a full suite of tools to help drive faster, more accurate, and more profitable product innovation.

Document management

CloudSuite PLM for Fashion is equipped with Infor Document Management (IDM), which serves as a single storage hub for images, documents, and files from CloudSuite PLM for Fashion and your other applications. IDM includes:

- Report building tool and storage for generated reports
- Compatibility with different document types based on meta data models, check-in/out
- Mobile application available for users to upload files and images on the go
- Simple search and navigation capabilities

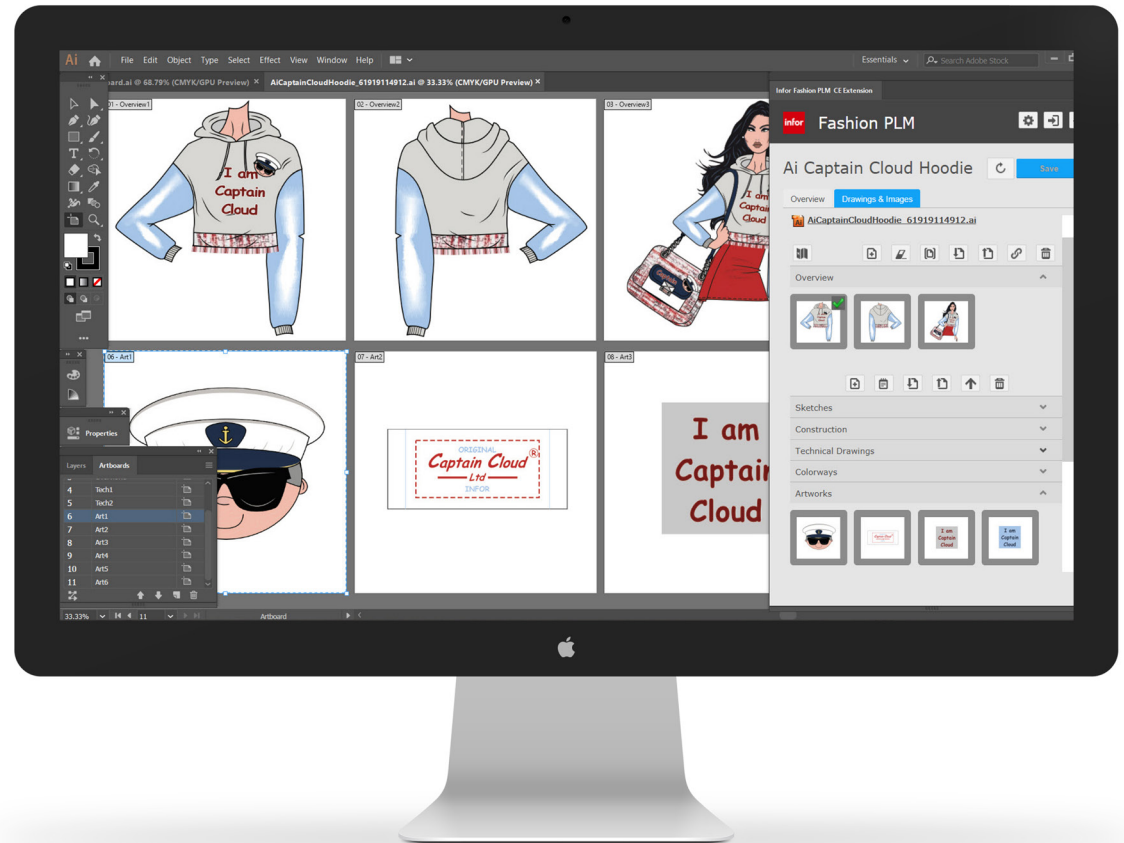

IDM is seamlessly integrated to CloudSuite PLM for Fashion, so users won't even notice that while adding images, documents, and files in PLM, they'll be automatically stored in the IDM system simultaneously for future use. Users can view their images and document thumbnails directly in PLM's document library without ever logging directly into IDM.

Leading fashion-specific functionality

Adobe Illustrator plugin

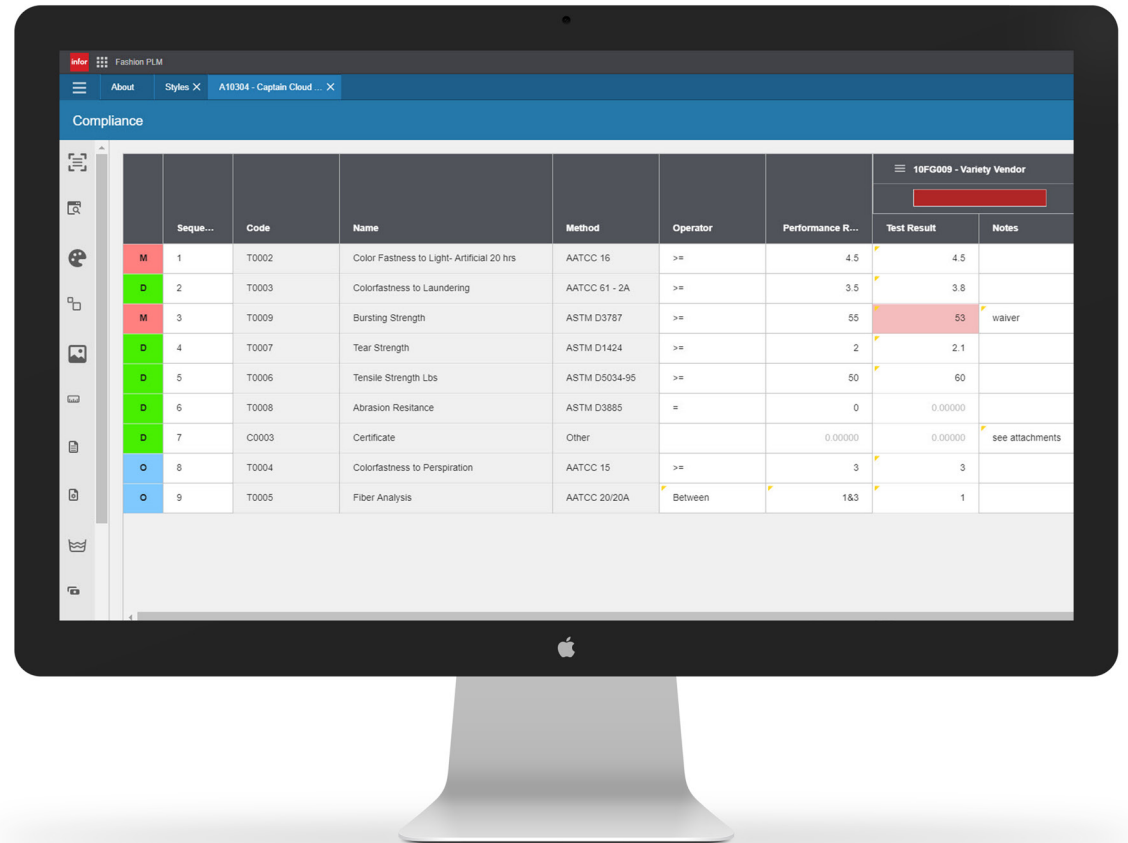

A plugin for Adobe Illustrator enables the bi-directional exchange of data between Adobe Illustrator and CloudSuite PLM for Fashion.

Leading fashion-specific functionality

Compliance tools

Protect brand integrity with centralized, raw material, product, and supplier compliance standards to quickly capture and upload testing and audit information.

	Seque...	Code	Name	Method	Operator	Performance R...	Test Result	Notes

Leading fashion-specific functionality

Critical path management

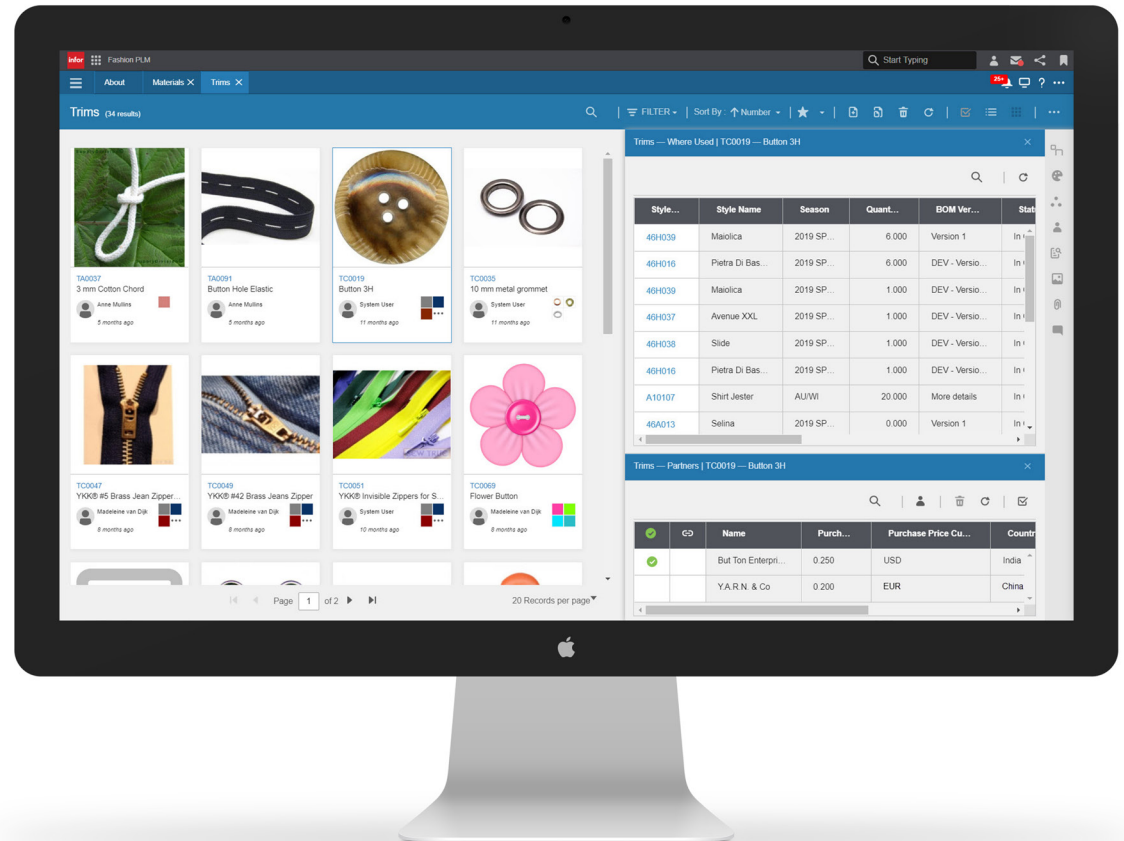

A critical path can be created for a season, collection, or group of products, with flexible application. For the critical path, users define an end date and the system will automatically calculate the start and due dates of the activities within each milestone leg.

Leading fashion-specific functionality

Material and trim development

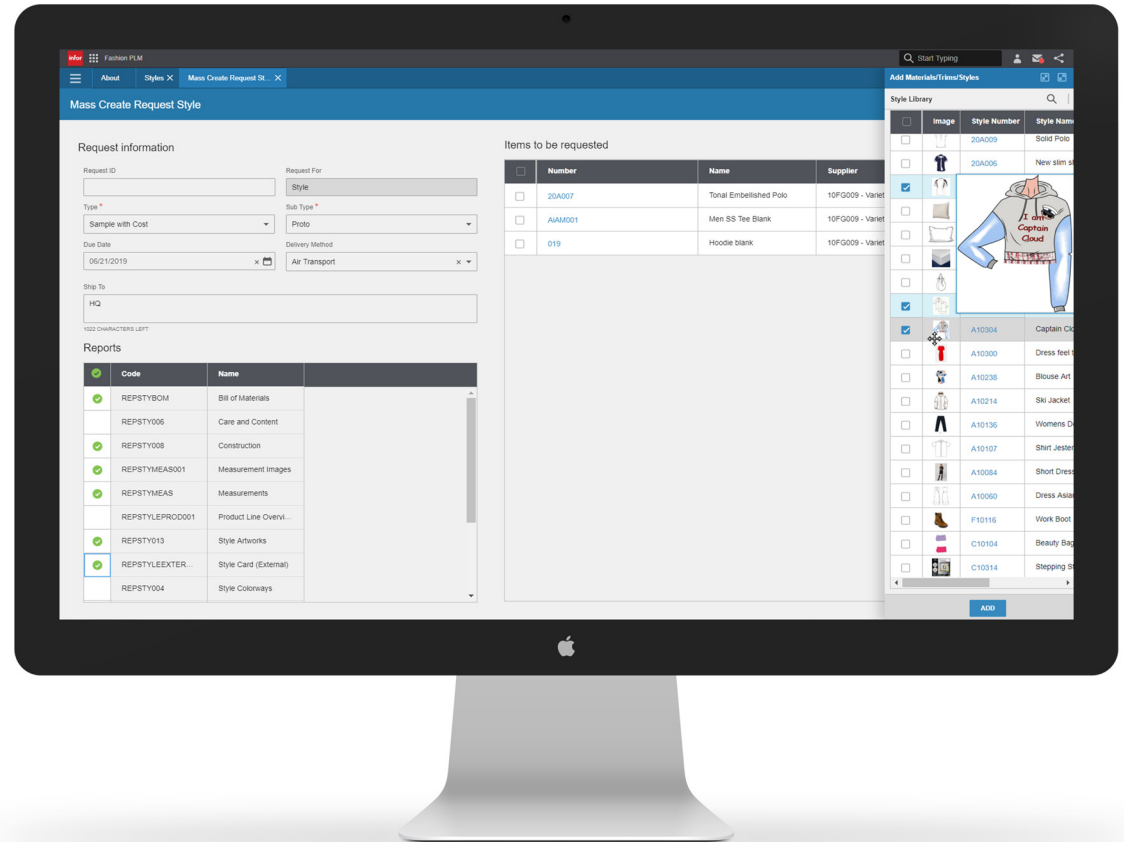

Group components, fabrics, and trims into libraries for reuse, which can help leverage buying power. Each item can be created from scratch, copied, mass created, and mass updated.

Leading fashion-specific functionality

Mass requests

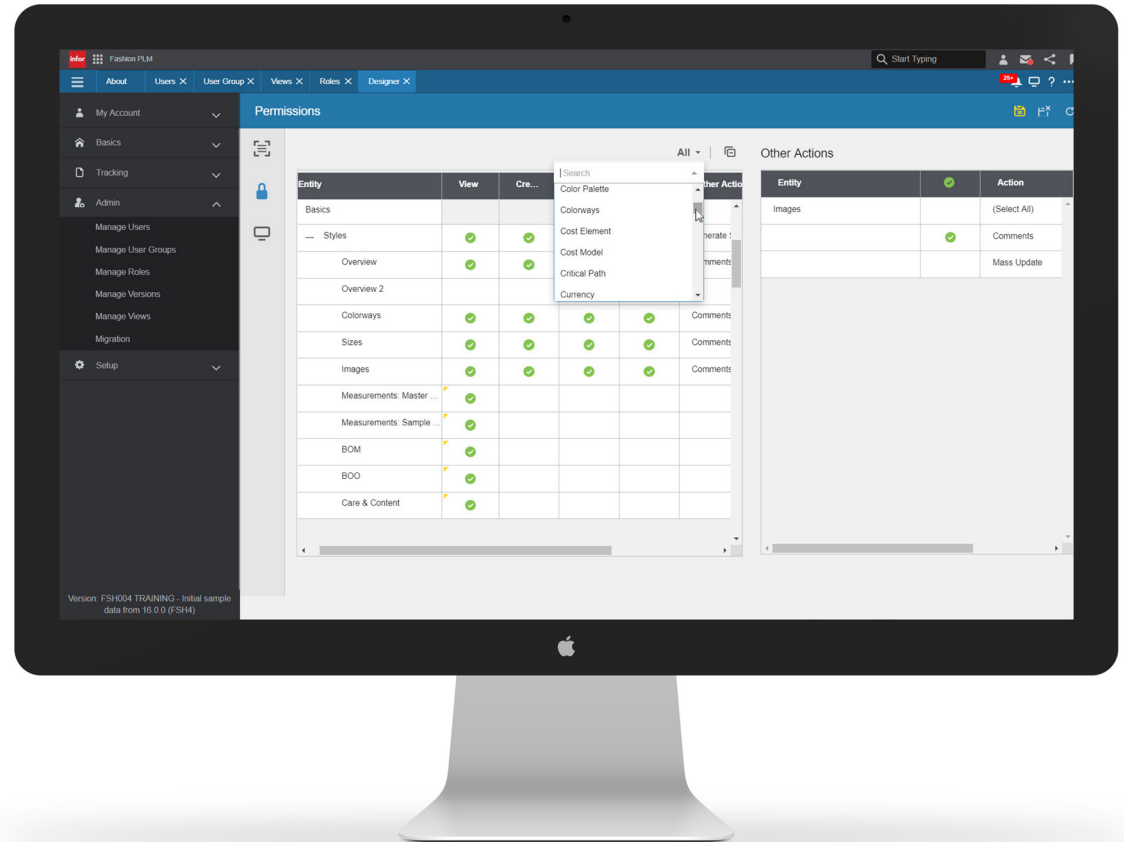

Quickly create requests for product costings, sampling, lab dips, performance and compliance testing, and supplier audits with just a few mouse clicks—then track and update all requests in a central dashboard.

Leading fashion-specific functionality

Administration tools

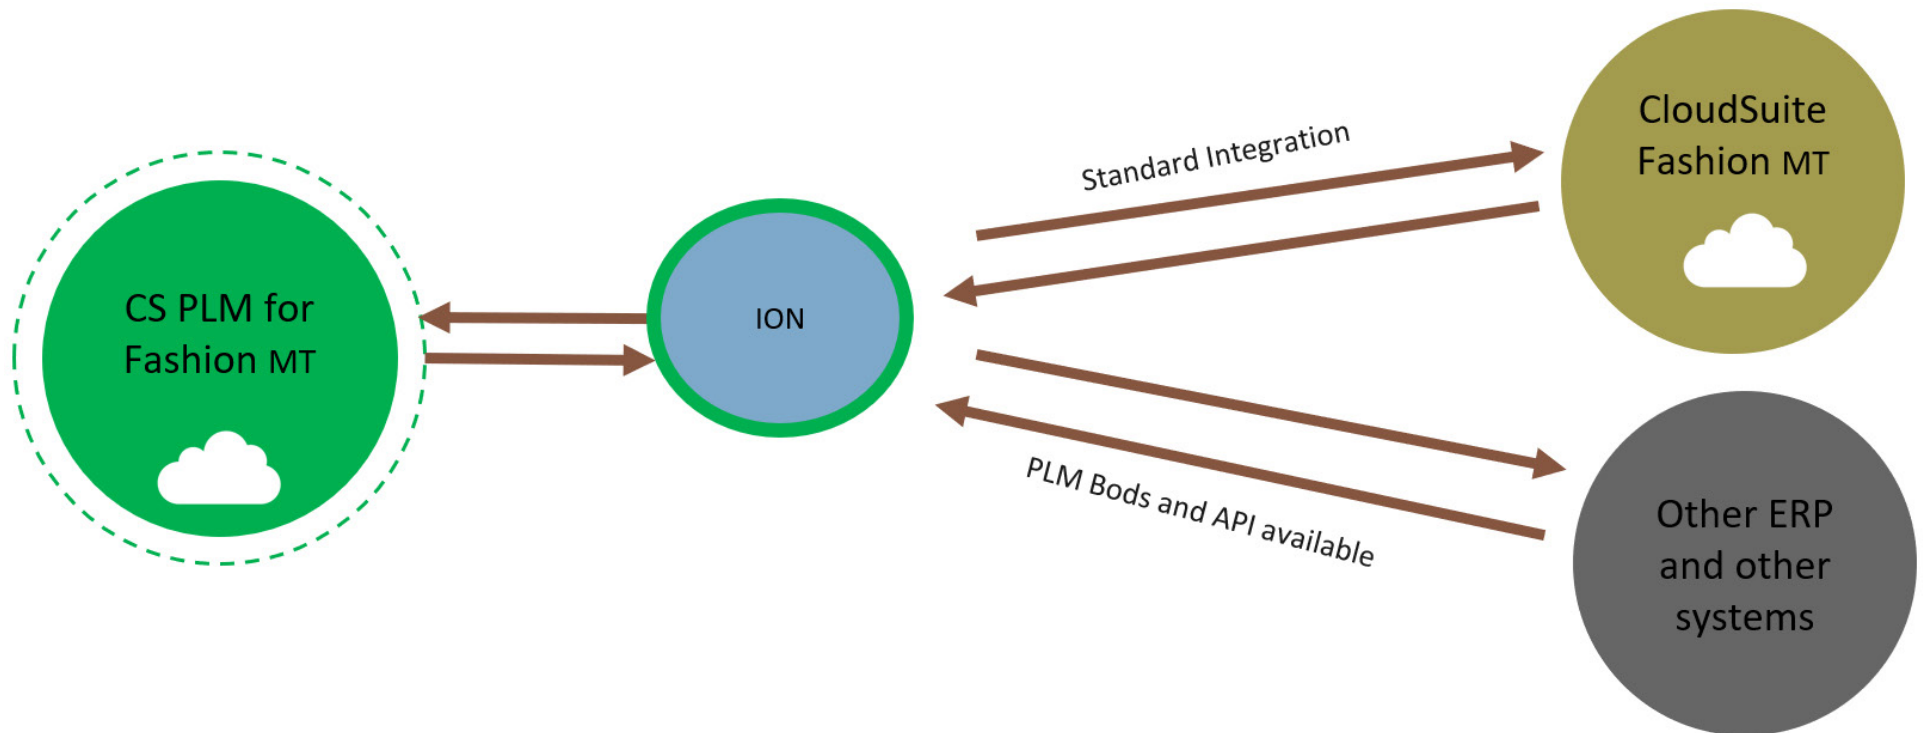

Control access to data with authorizations that can be tailored according to a user's role, groups, and relationship with the business.

Leading fashion-specific functionality

System integration

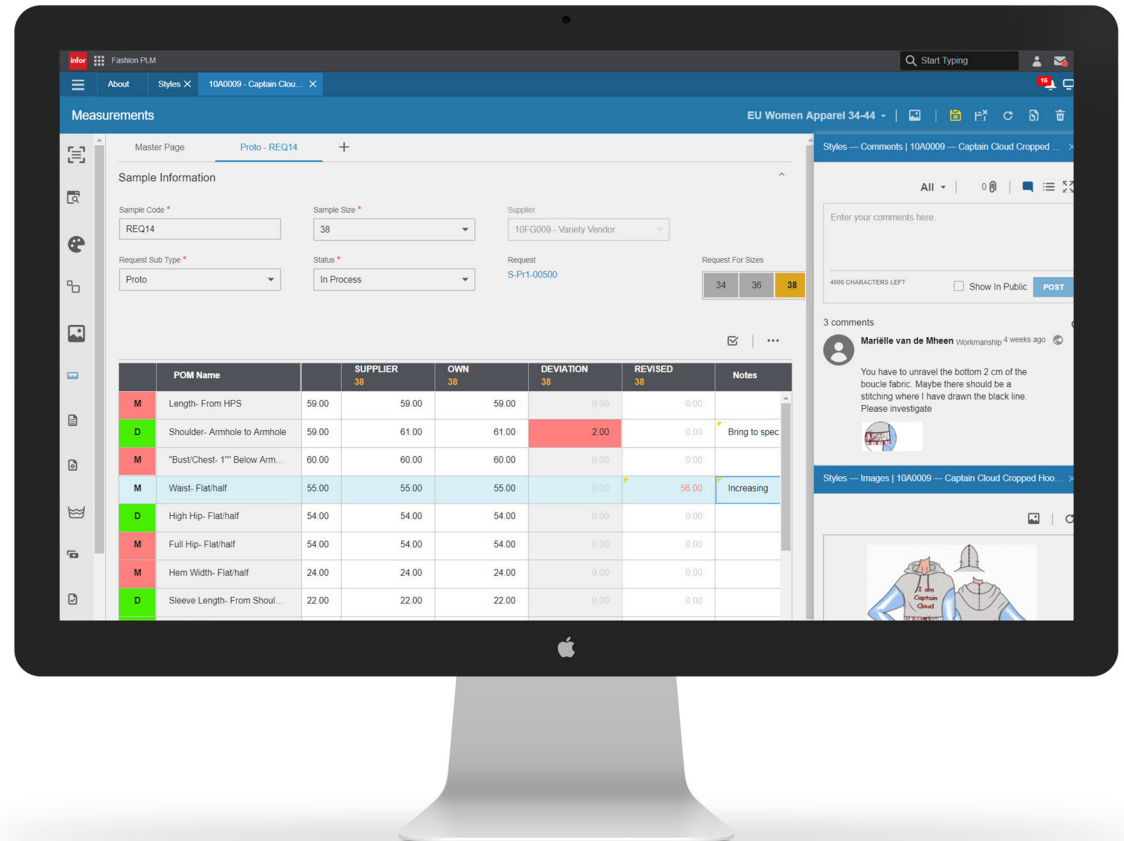

Incorporate CloudSuite PLM for Fashion data into your ERP system and migrate existing data into the solution through Infor ION.

Leading fashion-specific functionality

Partner collaboration

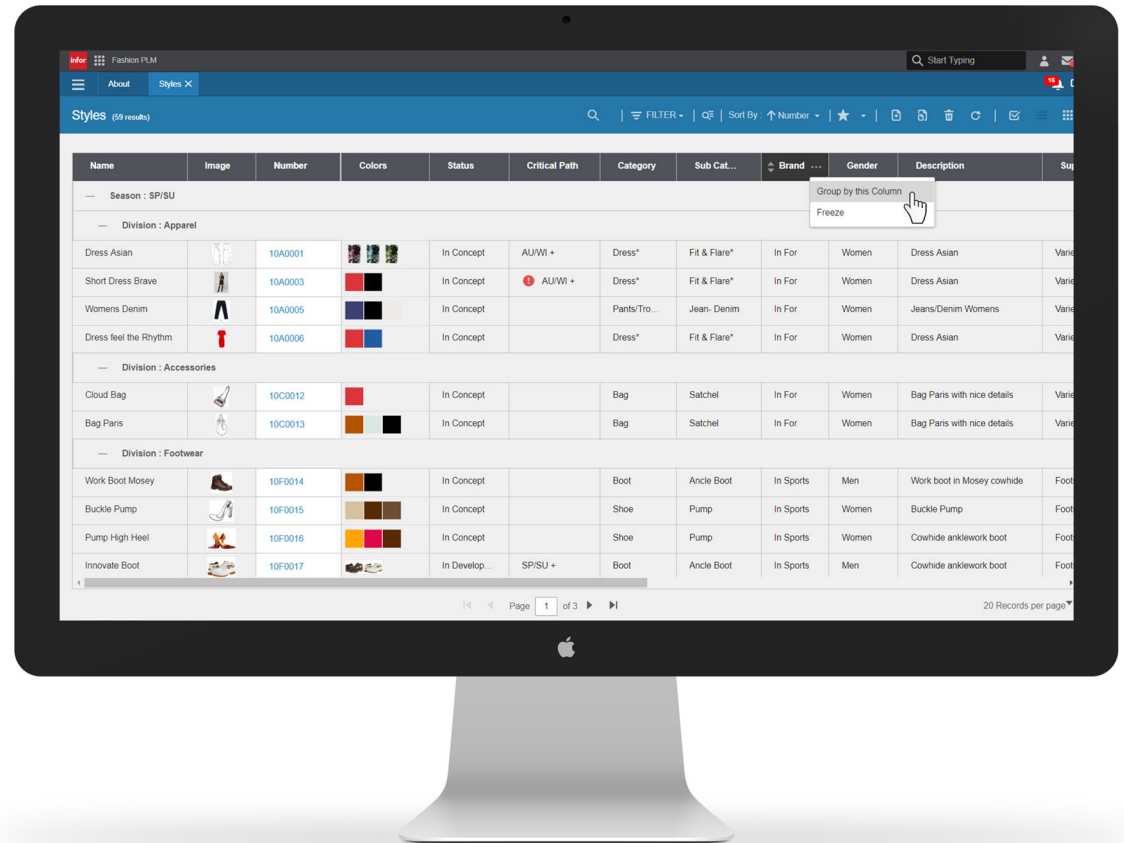

Share tech pack information and work more closely with selected suppliers on specifications and costs by leveraging the collaboration capabilities within CloudSuite PLM for Fashion. All access is controlled through configurable permissions.

Leading fashion-specific functionality

Excel-like functionality

With a list interface similar to that of Excel™, it's simple for first-time users to learn how to use CloudSuite PLM for Fashion. With personalized homepages and beautiful design, CloudSuite PLM for Fashion creates a superior experience for the whole team.

An elegant solution to suit any business

Easy to learn and simple to use, CloudSuite PLM for Fashion provides a meaningful user experience that can inspire teams and enhance performance across the value chain.

- A modern platform keeps businesses ready for the future
- Scalability supports small to large enterprises to keep up with growth plans
- Intuitive, configurable user interface
- Rich, industry-specific functionality
- Standardized, streamlined processes and workflows
